Biomembranes

Vol. 1068, 1991

Cumulative Contents

Regular Papers

Identification of calmodulin-sensitive Ca^{2+}-transporting ATPase in the plasma membrane of bovine corneal epithelial cell
P.S. Reinach, N. Holmberg and R. Chiesa (U.S.A.) 1

Effect of the antitumour protein α-sarcin on the thermotropic behaviour of acid phospholipid vesicles
M. Gasset, M. Oñaderra, A. Martínez del Pozo, G.-P. Schiavo, J. Laynez, P. Usobiaga and J.G. Gavilanes (Spain, Italy) 9

Differences in the susceptibility of various cation transport ATPases to vanadate-catalyzed photocleavage
E. Molnar, S. Varga and A. Martonosi (U.S.A.) 17

Covalent labeling of the cytoplasmic or luminal domains of the sarcoplasmic reticulum Ca^{2+}-ATPase with fluorescent azido dyes
E. Molnar, S. Varga, I. Jona and A. Martonosi (U.S.A.) 27

Interaction of amphiphilic substrates (acyl-CoAs) and their metabolites (free fatty acids) with microsomes from mouse sciatic nerves
H. Juguelin, J.J. Bessoule and C. Cassagne (France) 41

Transport of phosphatidylinositol to rat hepatocyte plasma membrane catalyzed by phosphatidylinositol transfer protein
C.A. Borror and G.M. Helmkamp, Jr. (U.S.A.) 52

Membrane interaction of 'peptide P' derived from the repeating motif of properdin
S. Stankowski, J. Wey, E. Kalb and D. Goundis (Switzerland) 61

Effect of polar carotenoids on the oxygen diffusion-concentration product in lipid bilayers. An EPR spin label study
W.K. Subczynski, E. Markowska and J. Sielewiesiuk (Poland, U.S.A.) 68

Conditions for a backward-running Na^+/K^+ pump in *Xenopus* oocytes
A. Efthymiadis and W. Schwarz (F.R.G.) 73

Existence of two fast inactivation states in cardiac Na channels confirmed by two-stage action of proteolytic enzymes
Y.I. Zilberter and L.G. Motin (U.S.S.R.) 77

Fluctuation and rotation of human growth hormone-releasing factor in the presence and the absence of phospholipid bilayer analyzed by time-resolved fluorescence depolarization
S. Honda, H. Morii, S. Ohashi and H. Uedaira (Japan) 81

Regulatory changes in the K^+, Cl^- and water contents of HeLa cells incubated in an isosmotic high K^+-medium
T. Ikehara, A. Takahashi, H. Yamaguchi, K. Hosokawa, T. Masuya and H. Miyamoto (Japan) 87

Sodium-calcium exchange in membrane vesicles from aortic myocytes: Stimulation by endogenous proteolysis masks inactivation during vesicle preparation
R.-M. Lyu, J.P. Reeves and J.B. Smith (U.S.A.) 97

Spermine uptake by rat intestinal brush-border membrane vesicles
K. Iseki, M. Kobayashi and K. Miyazaki (Japan) 105

The effect of a membrane potential on the interaction of mastoparan X, a mitochondrial presequence, and several regulatory peptides with phospholipid vesicles
A.I.P.M. De Kroon, J. De Gier and B. De Kruijff (The Netherlands) 111

Effects of divalent cations and pH on amiloride-sensitive Na^+ fluxes into luminal membrane vesicles from pars recta of rabbit proximal tubule
J. Blokkebak-Poulsen, M.I. Sheikh and C. Jacobsen (Denmark) 125

Pharmacokinetics of stealth versus conventional liposomes: effect of dose
T.M. Allen and C. Hansen (Canada) 133

Kidney brush-border membrane transporters: differential sensitivity to diethyl pyrocarbonate
B. Beaumier and R. Béliveau (Canada) 142

Spectra of voltage-sensitive fluorescence of styryl-dye in neuron membrane
P. Fromherz and A. Lambacher (Germany) 149

Epifluorescence microscopic observation of monolayers of dipalmitoylphosphatidylcholine: dependence of domain size on compression rates
K. Nag, C. Boland, N. Rich and K.M.W. Keough (Canada) 157

Modulation of Na^+/H^+ exchange and intracellular pH by protein kinase C and protein phosphatase in blood platelets
A.A. Livne, O. Aharonovitz, H. Fridman, Y. Tsukitani and S. Markus (Israel) 161

Thyroid hormones control lipid composition and membrane fluidity of skeletal muscle sarcolemma
M. Pilarska, A. Wrzosek, S. Pikuła and K.S. Famulski (Poland) 167

Membrane-associated ATPase from *Zymomonas mobilis*; purification and characterization
L. Reyes and R.K. Scopes (Australia) 174

A zein signal sequence functions as a signal-anchor when fused to maize alcohol dehydrogenase
R.G. Shatters, Jr. and J.A. Miernyk (U.S.A.) 179

Deuterium NMR investigation of polymorphism in stratum corneum lipids
W. Abraham and D.T. Downing (U.S.A.) 189

Effective charge of melittin upon interaction with POPC vesicles
G. Beschiaschvili and H.-D. Baeuerle (Switzerland) 195

Polarized infrared attenuated total reflectance spectroscopy of the Ca^{2+}-ATPase of sarcoplasmic reticulum
R. Buchet, S. Varga, N.W. Seidler, E. Molnar and A. Martonosi (U.S.A.) 201

Modulation of the activity of hepatic glucose-6-phosphatase by methylthioadenosine sulfoxide
M. Speth and H.-U. Schulze (F.R.G.) 217

Na^+-dependent transport of anionic amino acids by preimplantation mouse blastocysts
L.J. Van Winkle, D.F. Mann, B.D. Weimer and A.L. Campione (U.S.A.) 231

An energy-dependent efflux system for potassium ions in yeast
A. Peña and J. Ramírez (México) 237

Electromechanical stability of planar lipid membranes from bipolar lipids of the thermoacidophilic archebacterium *Sulfolobus acidocaldarius*
G.B. Melikyan, N.S. Matinyan, S.L. Kocharov, V.B. Arakelian, D.A. Prangishvili and K.G. Nadareishvili (U.S.S.R.) 245

Phospholipase C activity-induced fusion of pure lipid model membranes. A freeze fracture study
K.N.J. Burger, J.-L. Nieva, A. Alonso and A.J. Verkleij (The Netherlands, Spain) 249

Rapid Reports

The conductance of single cardiac sodium channels from guinea pig depends on the intracellular sodium concentration
R. Albitz, G. Droogmans and B. Nilius (Germany, Belgium) 254

Measurement of the local translational diffusion rates of proteins by saturation transfer EPR spectroscopy
V.V. Khramtsov and D. Marsh (Germany) 257
